The HR Recruiter,

The Stepping Stones Elementary School.

Subject: Application for Learning Support Unit Opportunity

Hello,

I hope you are doing well. I recently came across your advert for the Learning Support Unit role, and I am excited to submit my application. I am a qualified secondary school teacher with a background in Swahili and History. Over time, I have developed a deep passion for technology, and I have worked hard to build skills in this area, which I truly enjoy.

While I have not worked directly in edtech, my experience in business-focused startups has given me a solid understanding of how technology can transform industries—including education. I am a strong believer that embracing innovation and technology can set schools apart and drive real progress. I am eager to bring my skills and knowledge to education, helping to integrate technology in ways that can enhance learning and engage students.

On a personal note, I am a family man with children who will soon be joining school. This adds an extra layer of motivation for me as I apply for this role. I want to help my own children and others succeed in a world that is increasingly shaped by technology. This opportunity feels like the perfect way to combine my background in teaching, my passion for innovation, and my personal commitment to making a positive impact in education.

I had been honored to be considered for the suitability assessment for this role. Thank you for your time and consideration, and I look forward to hearing from you soon.

Best regards,
Fred Osege
